

# Eight *Piggies*

Identity system for a two-founder tech & AI consultancy in Barbados. Warm riso-print editorial — ink outlines, offset shadows, one memorable pig.

*“This little piggy went to production.”*

**Instrument Sans**                                              400-700 • workhorse

HIERARCHY

H1 • FRAUNCES  
650

**This little piggy went to  
*production.***

H2 • FRAUNCES  
650

**Eight piggies. One consultancy.**

LEDE • SANS  
600

Live systems, not slide decks — we ship nationally.

BODY • SANS  
400

Applied AI, embedded engineering and search strategy from Barbados.

LABEL • MONO

EYEBROW • UPPERCASE

RULES

- 1 Headlines set in **Fraunces**, tight-tracked (-2%), opsz high. One italic phrase max per headline — that's the wink.
- 2 Everything functional is **Instrument Sans**. Labels and metadata switch to **JetBrains Mono**, uppercase, +18% tracking.
- 3 Never set body copy in Fraunces. Never set headlines in Sans. The pairing only works because each keeps its job.

PRINCIPLE 01

LIVE SYSTEMS

# Not slide *decks*.

Every claim points at something running. **Proof over promise** — if it isn't in production, it doesn't go in the copy.

PRINCIPLE 02

SERIOUS / UNSERIOUS

# Piggy name, *engineer's* hands.

The name is a nursery rhyme; the work is national infrastructure. **Playful surface, rigorous underneath** — never the reverse.

PRINCIPLE 03

CARIBBEAN GROUND

# Proven in *Barbados*.

Small island, national scale. Bajan phrasing stays — **Yuh Hear Dem, We Outside 246** — grounded, never touristy.
